FmHA REVISES FORMULA FOR DROUGHT EMERGENCY WATER SYSTEM GRANTS:

Continued From Page 1

Acting State Director Baker said the revised regulations will enable FmHA to apply a formula on grants similar to that used by other Federal Agencies that help to finance drought emergency water system projects.

In calculating a community's ability to repay an emergency loan for water system improvement, FmHA previously has taken into account existing indebtedness only for water facilities. The new formula lets FmHA take into account the applicant's existing indebtedness for all purposes. This is expected to increase the grant portion of FmHA funding of many projects.

The new regulation also provides that some projects, previously not eligible for grant assistance, may receive FmHA grants of up to 20 percent of total eligible project development costs, if they are needed to safeguard public health and safety. A larger proportion of grant funds, up to 50 percent, may be provided if justified through the formula for determining the community's ability to repay a loan.

Applicaiton of the revised formula has been made retroactive to May 6, 1977, except where loan and grant funds have been delivered to the borrower. Financing of projects previously approved, but not yet funded will be adjusted to the new formula, Mr. Baker said.

IMMUNIZATIONS-DISEASE SERVICE PROVIDED FREE BY COUNTY HEALTH DEPT.

services.

The decision to charge has rested with local health directors. However, the return to a no-charge policy is statewide and comes at a time of renewed childhood immunization efforts and increasing venereal disease cases.

One goal of a national immunization program is to have 90 per cent of all children under 15 protected against common childhood diseases by October, 1979.

Routine immunizations that local health departments will provide at no cost include: diphtheria, pertussis, tetanus, polio, measles and rubella. Mumps vaccine is considered routine whenever it is given with measles and rubella vaccines in the course of routine childhood immunizations.

Charges will be made for non - routine immunizations, however, except those purchased with federal monies. Non - routine immunizations include such "exotic" vaccines as plague, influenza, typhus, rocky mountain spotted fever, cholera, typhoid, yellow fever, smallpox and any immunization the purpose of which is to protect an individual in foreign travel.
